- minden attachment komplett
 - megfelelő típusok a csatlakozási pontokon
 - használható formátum
 - nem nulla méret
- legalább egy képbuffer van
- implementáció függő megkötések

Framebuffer

- Beállítás a renderelés célpontjává

```
glBindFrameBuffer(GL_FRAMEBUFFER, framebufferObject);  
glDrawBuffers(planes, buffers);  
glViewport(0, 0, width, height);
```

- Megkötések

- Ha nem egyforma méretűek a bufferek
 - A metszet területre rajzolunk
- Ha nem egyforma a layerek száma
 - A metszet layerekre rajzolunk
- A többi pixel értéke határozatlan lesz!
